

Seeking Class Member

Website Survey Residential:

1) Expand the availability of "whole house" energy efficiency repairs and renovations for low income home owners up to 200% of the federal poverty level. This best practice approach is intended to leverage additional proven ancillary benefits in health status and educational achievement.

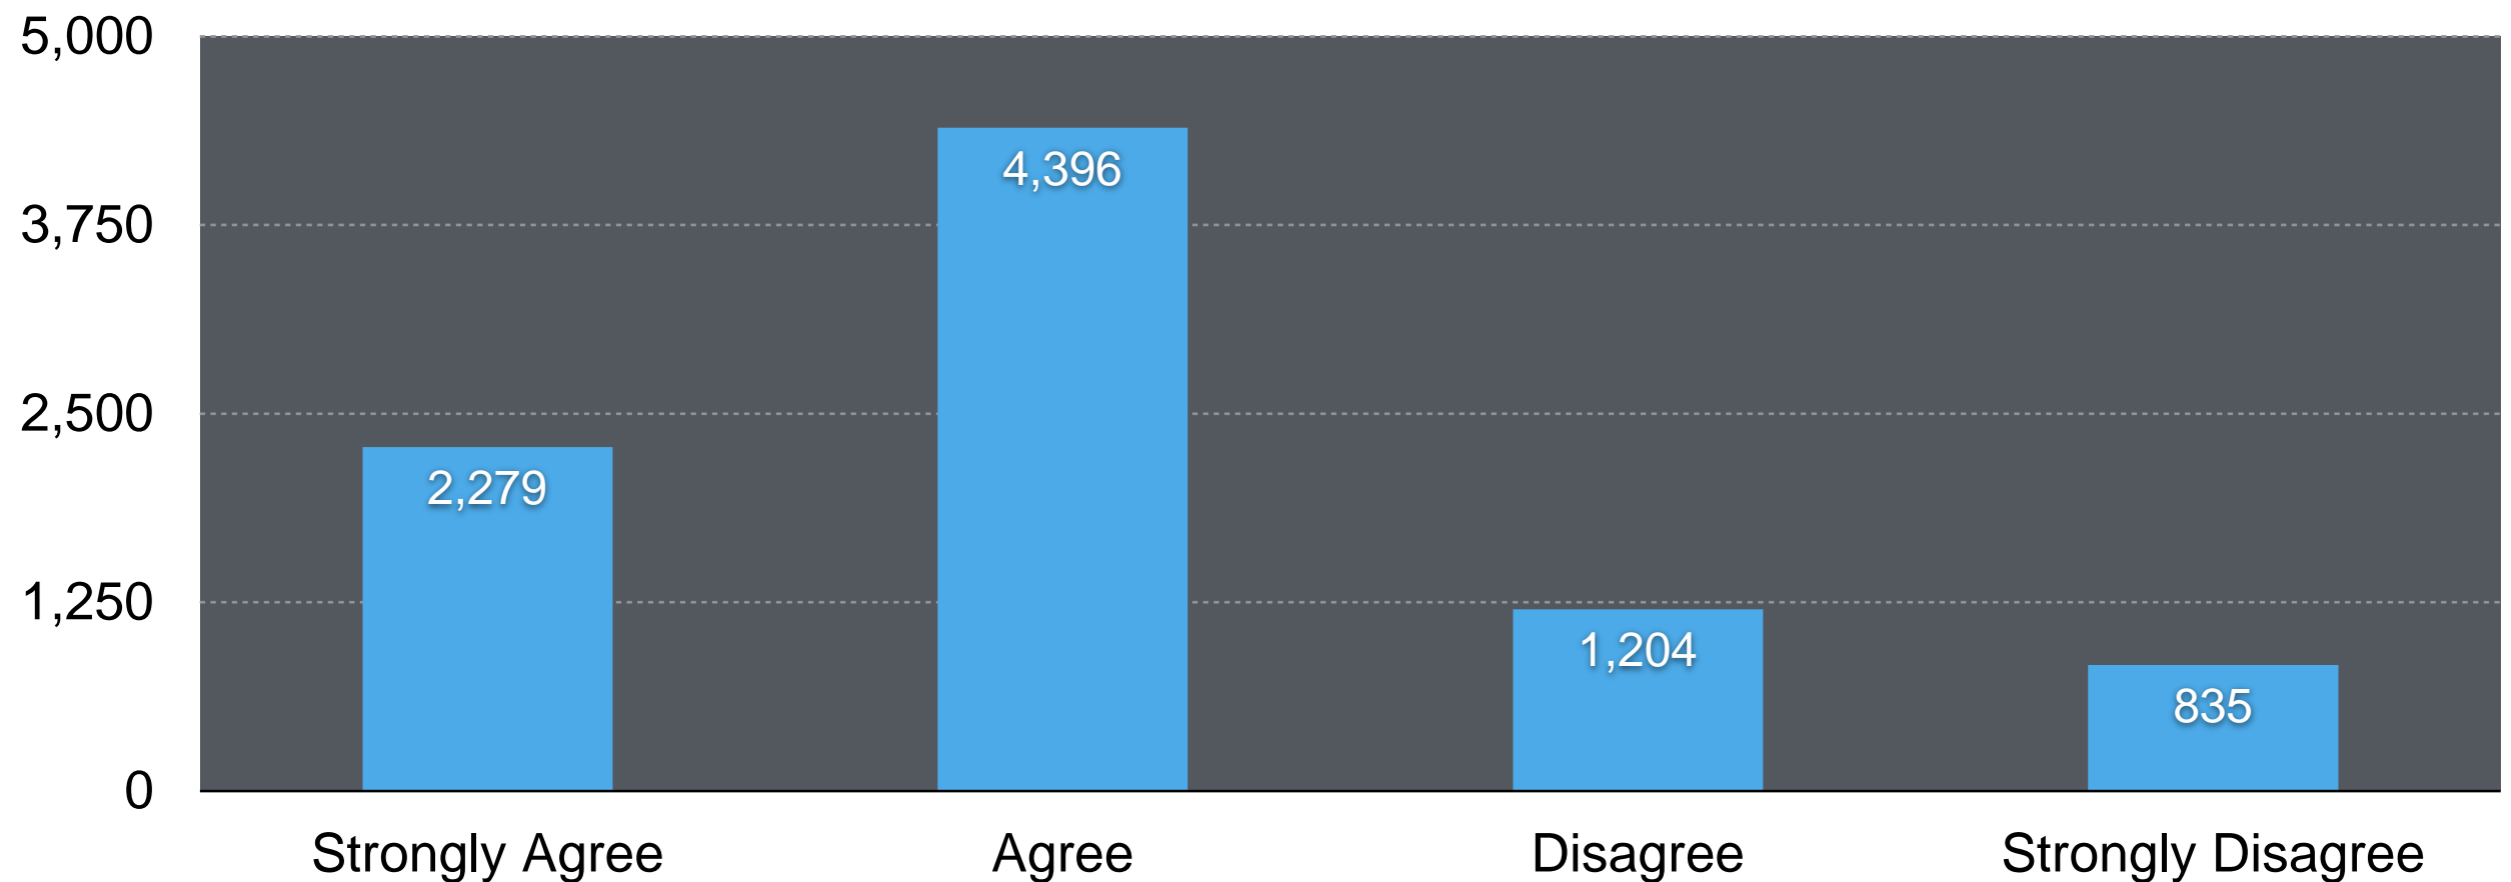

(as of 4/15/2016)

Seeking Class Member

Website Survey Residential:

2) Increase the availability of low-interest loan funds for home owners and multi-family unit landlords to fund energy efficiency improvements. Structure as a revolving loan fund so that there is a lasting legacy of support for energy efficiency in the region.

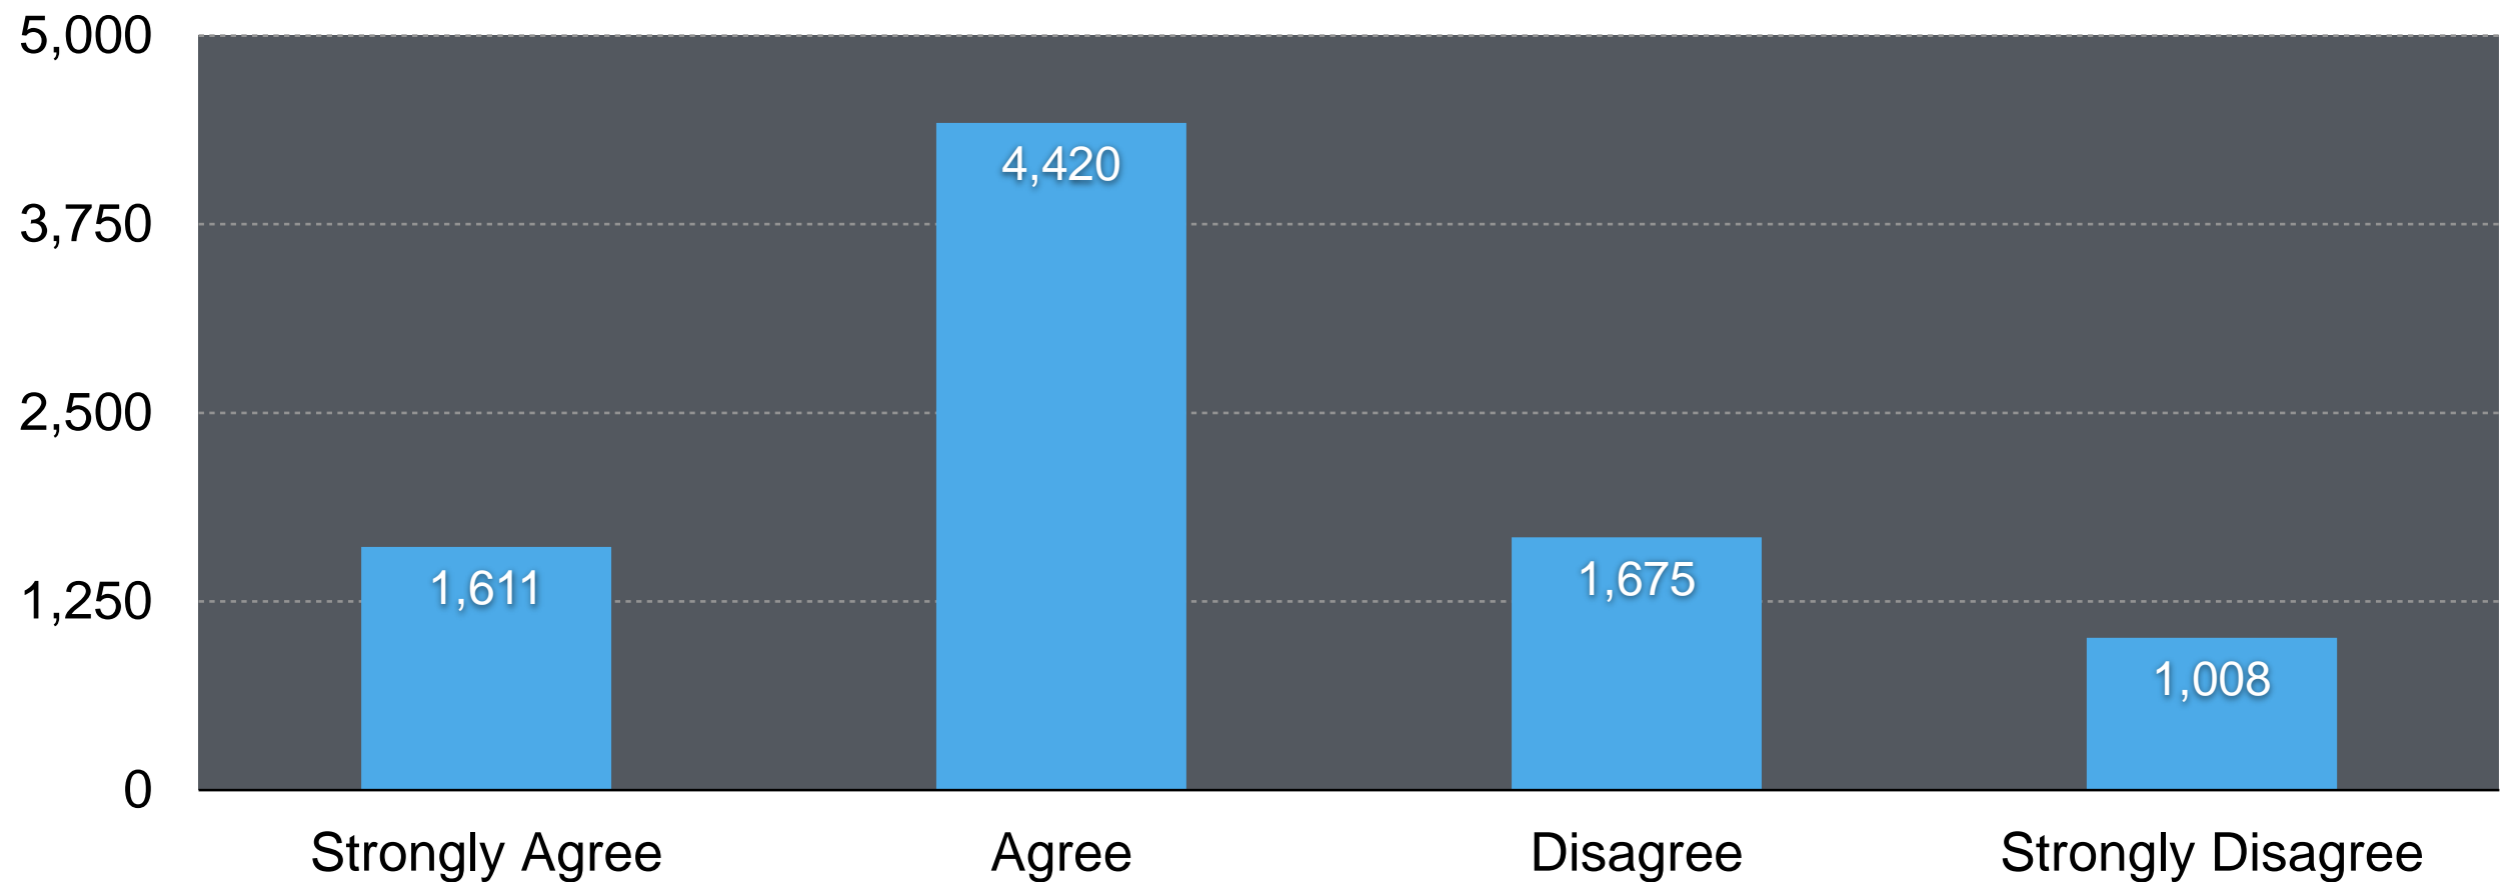

(as of 4/15/2016)

Seeking Class Member

Website Survey Residential:

3) Increase the uptake of existing and new energy efficiency programs and funding opportunities by setting up outreach and education initiatives with "validators," e.g., existing community and nonprofit organizations and/or contractors that have trusted relationships with targeted class members, including landlords of low-income rental units.

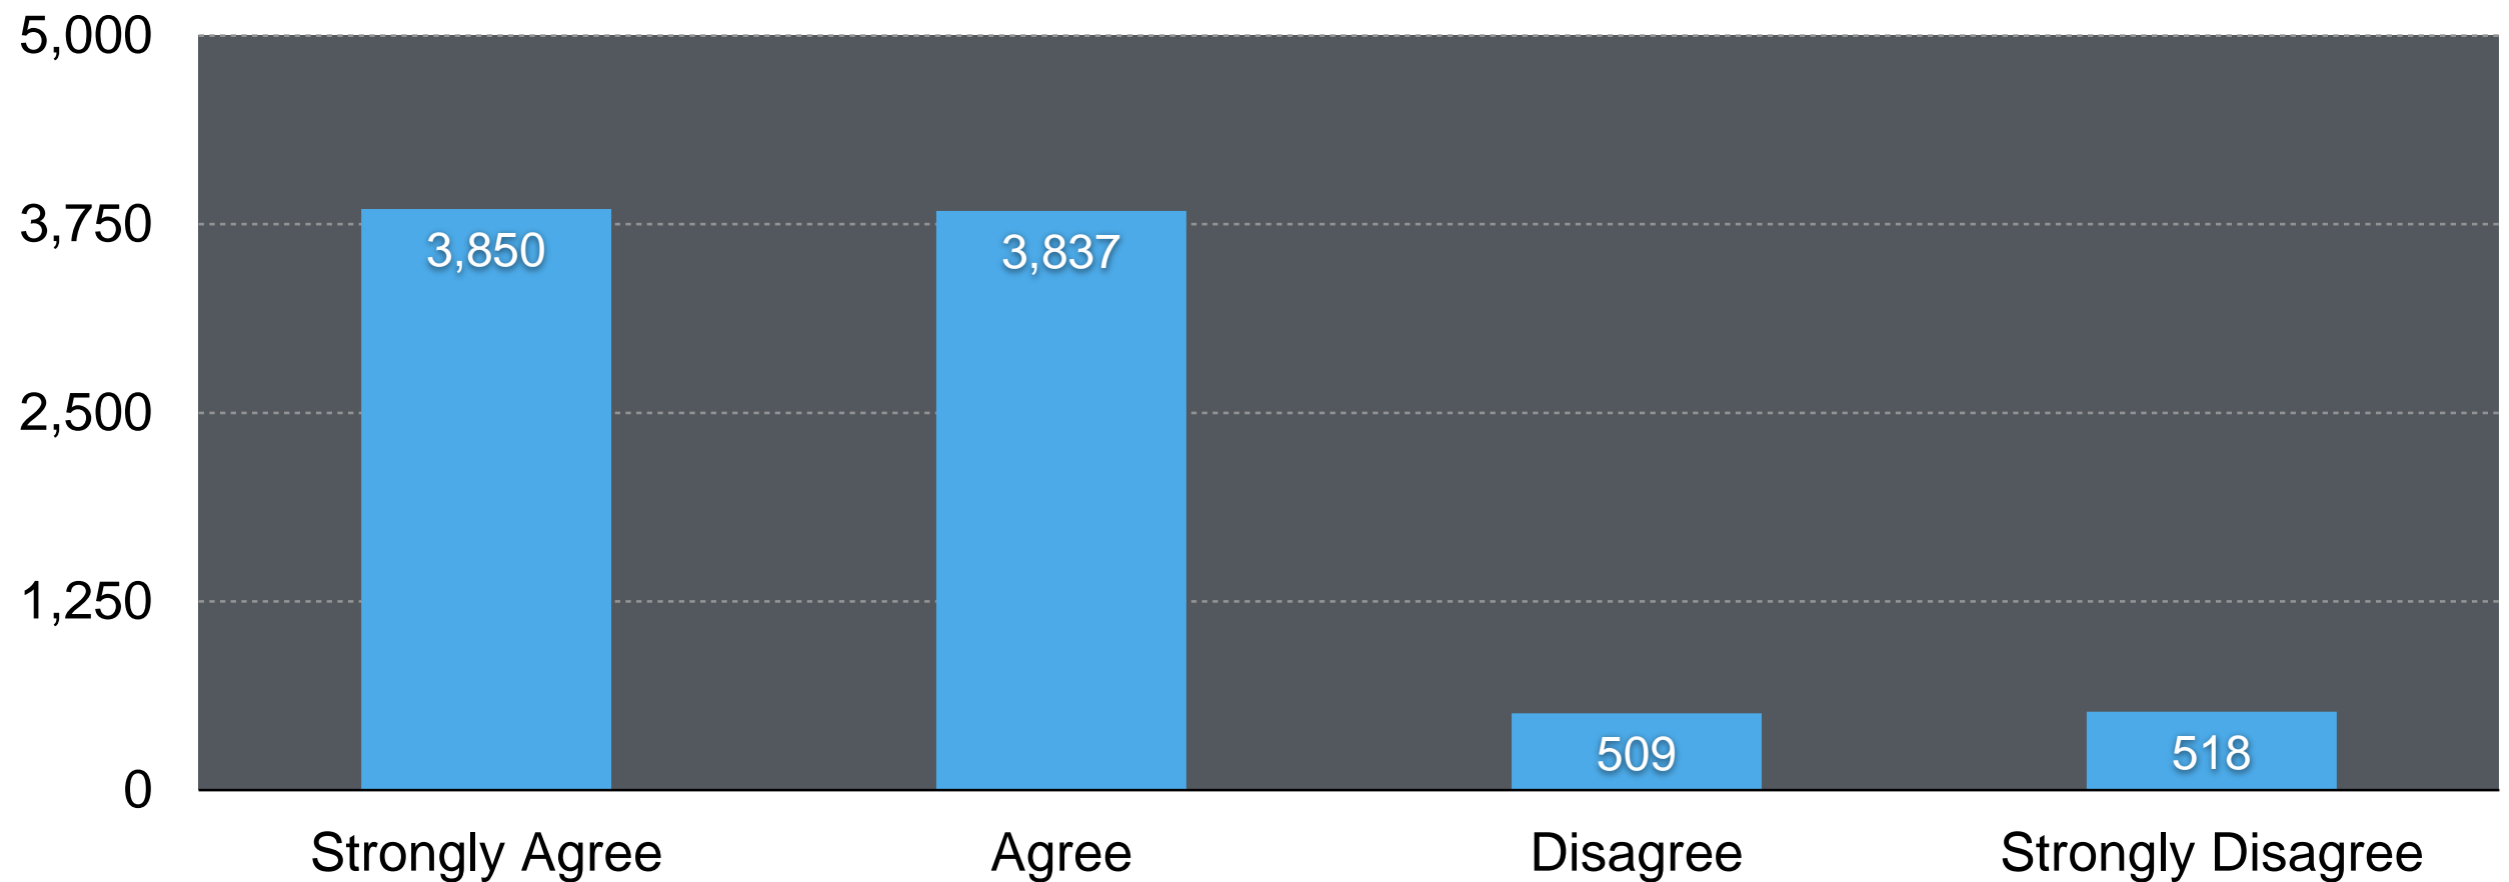

(as of 4/15/2016)

Seeking Class Member

Website Survey Residential:

4) Offer incentives to home owners and multi-family unit landlords to upgrade equipment to higher energy efficiency standards.

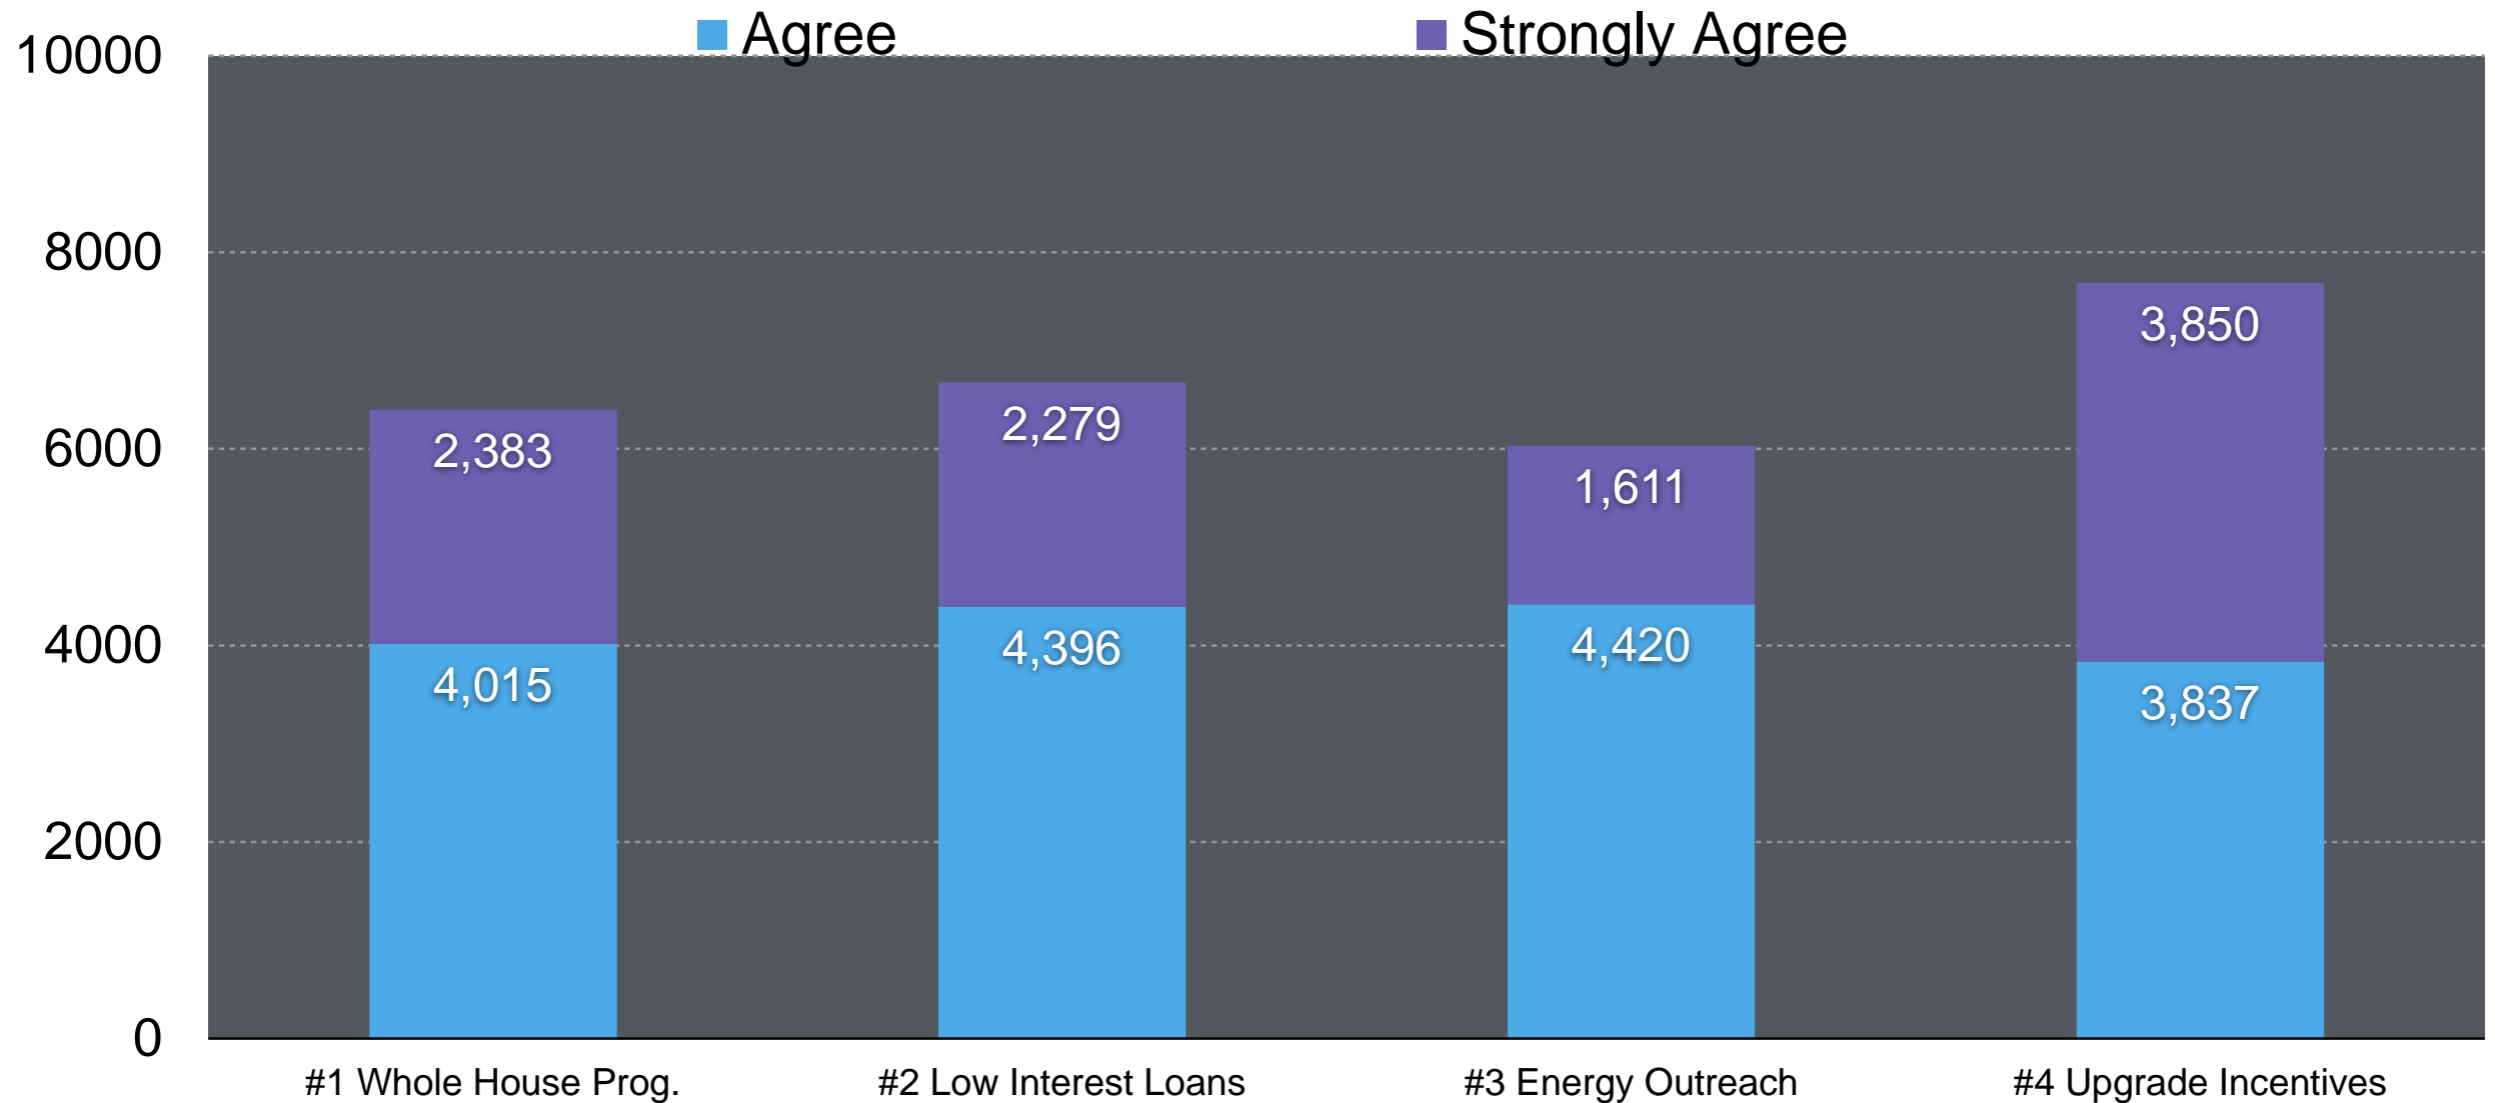

(as of 4/15/2016)

Seeking Class Member

Website Survey Residential:

Residential Positive Answer Summary of Questions

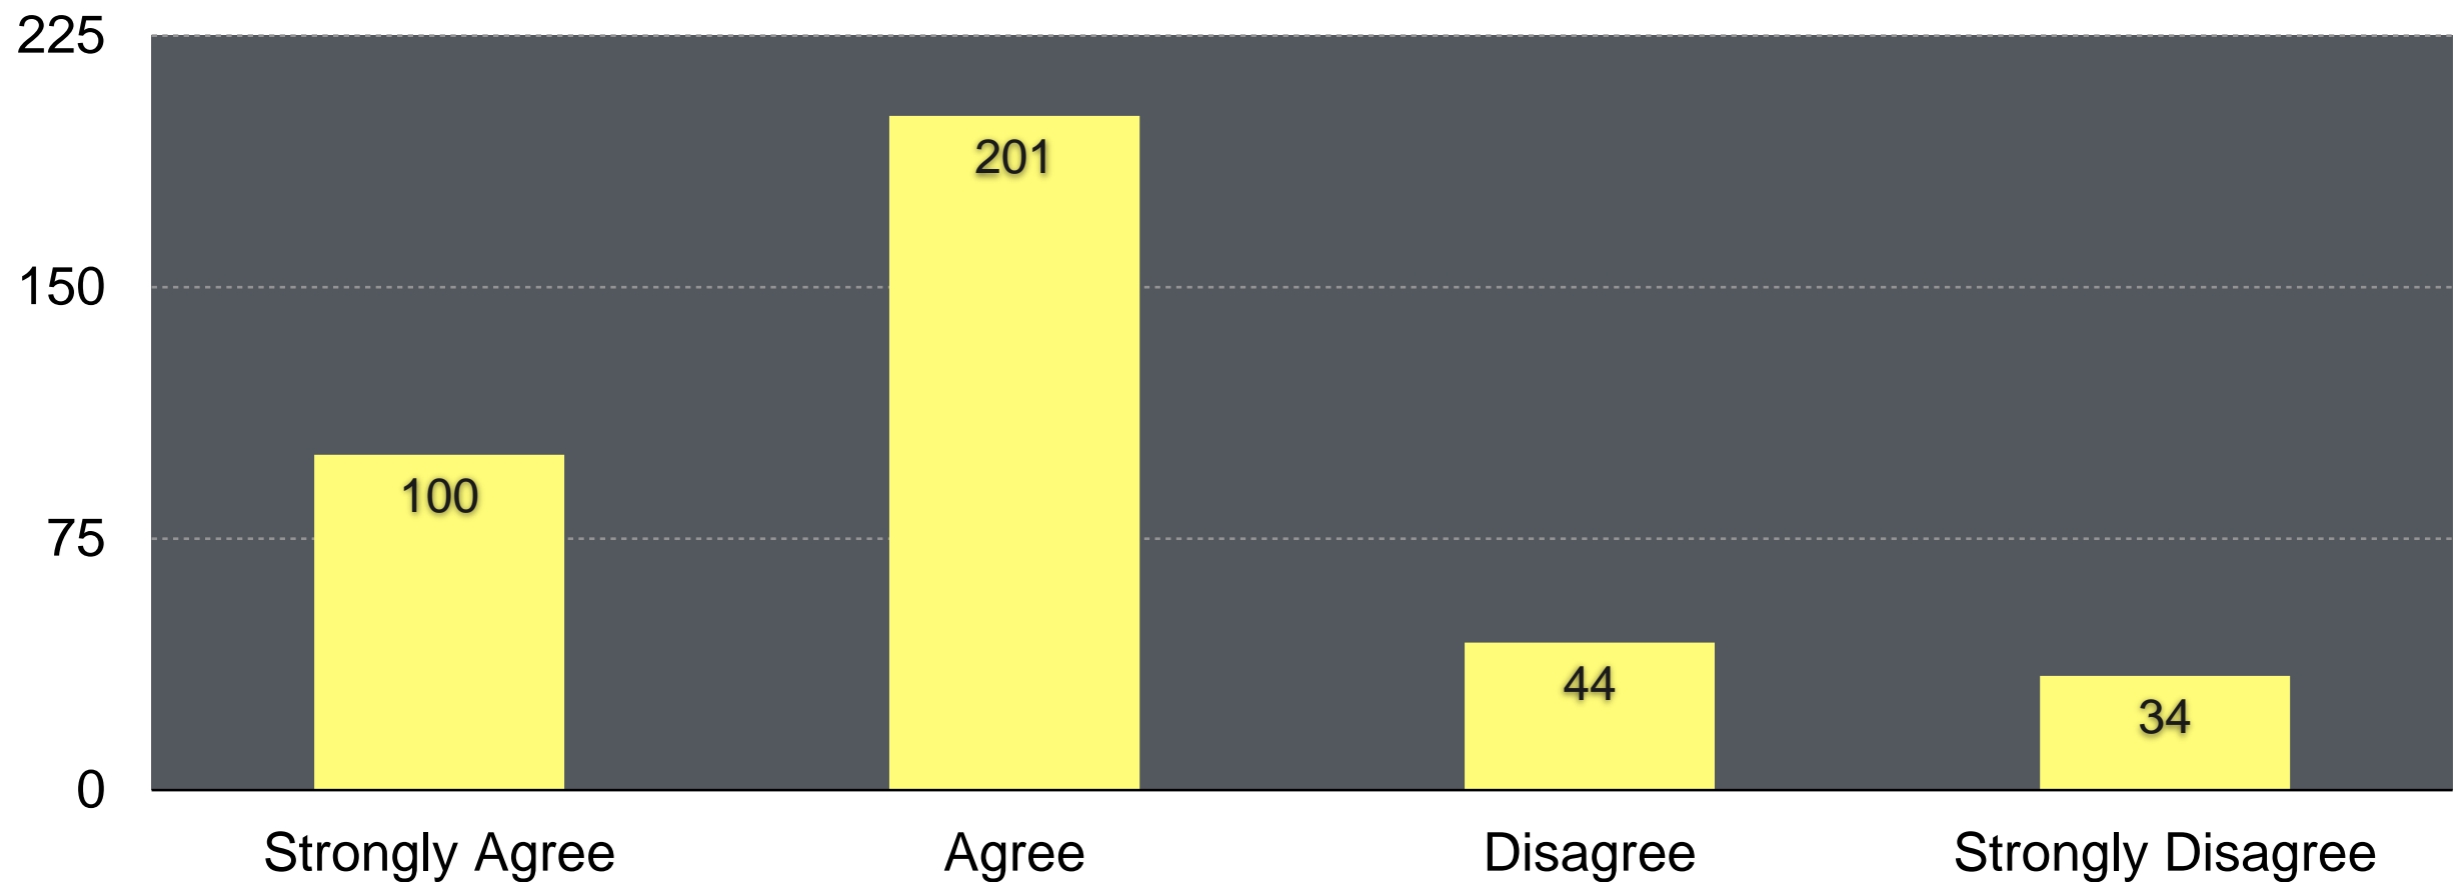

(as of 4/15/2016)

Seeking Class Member

Website Survey Non-Residential:

1) Train contractors via educational institutions and trade associations to increase the uptake of energy efficiency improvements in new and renovated commercial and industrial buildings. (This could also be designed to benefit residential customers.)

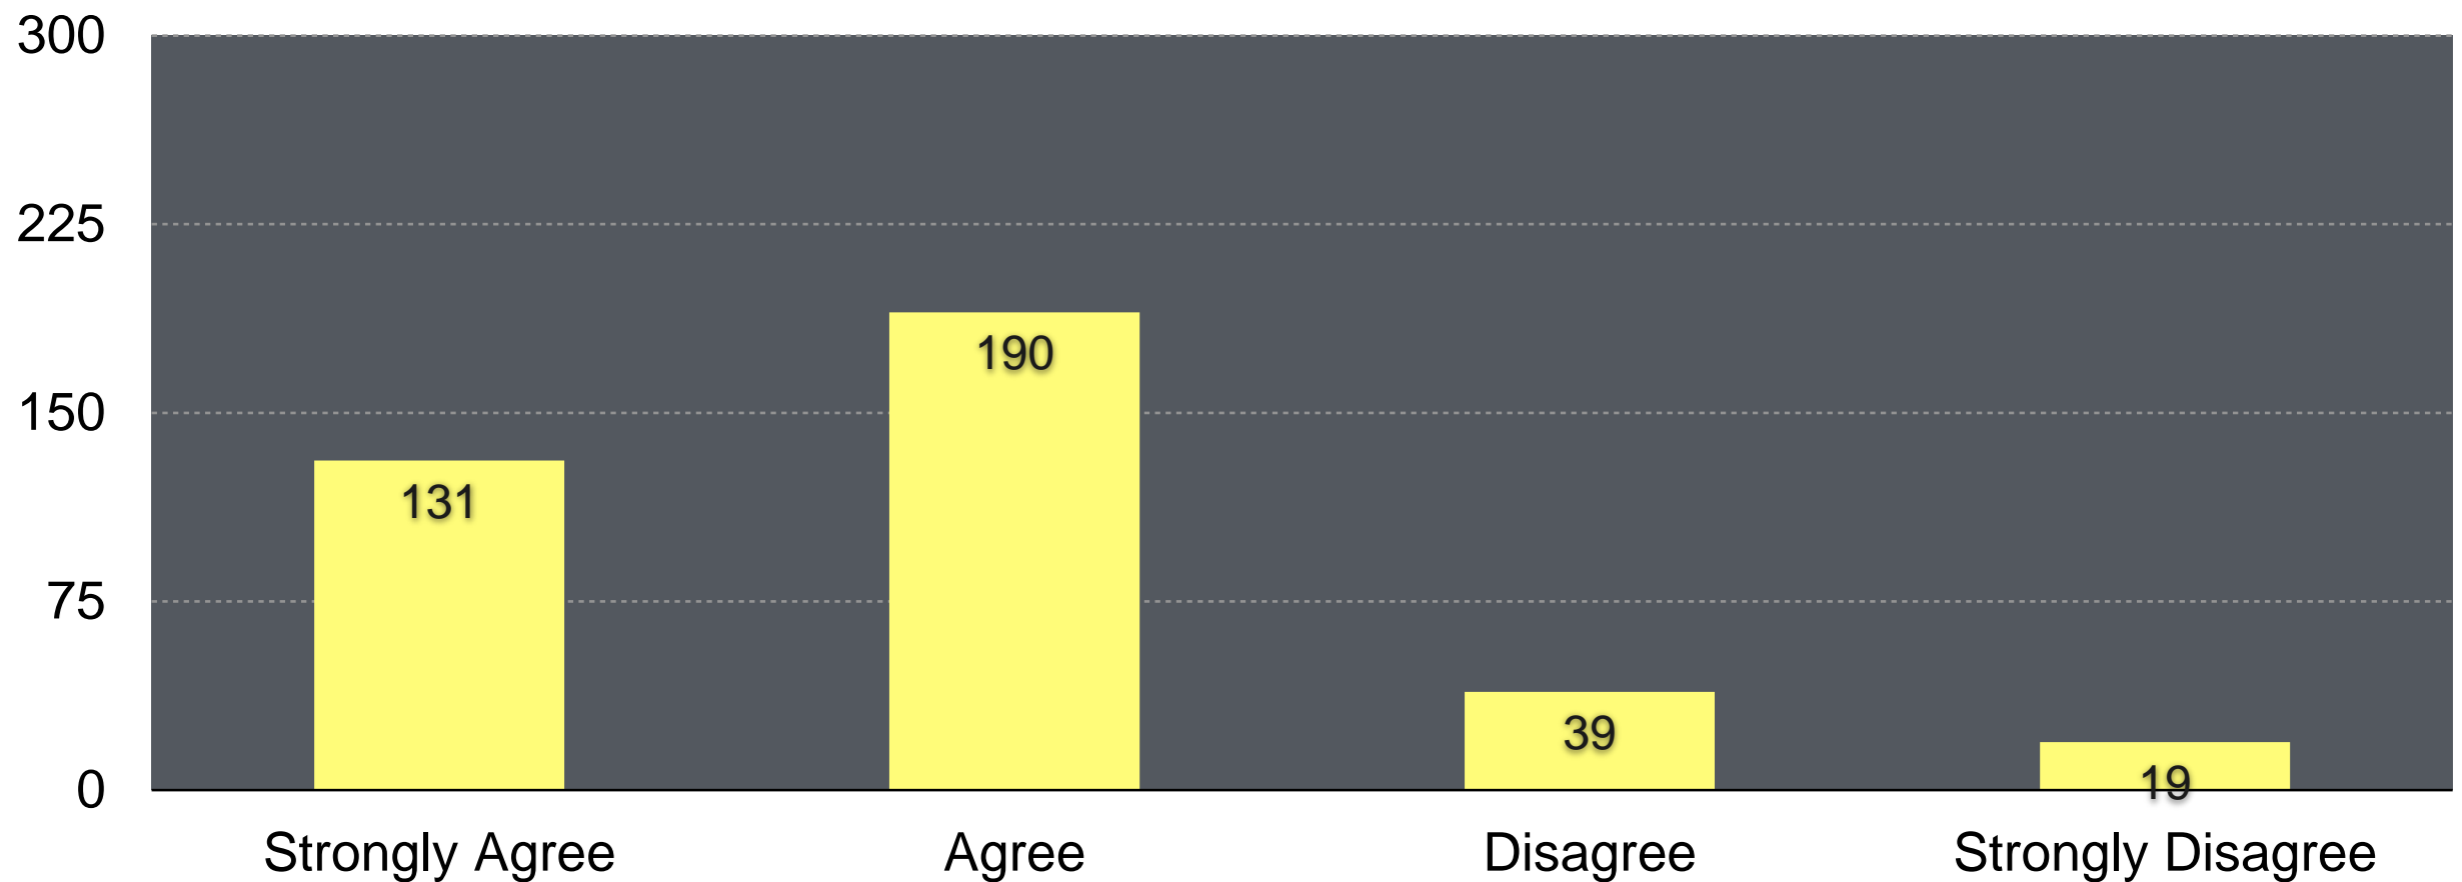

(as of 4/15/2016)

Seeking Class Member

Website Survey Non-Residential:

2) Increase the availability of low-interest loan funds for small and medium sized businesses to fund energy efficiency improvements. Structure as a revolving loan fund so that there is a lasting legacy of support for energy efficiency in the region.

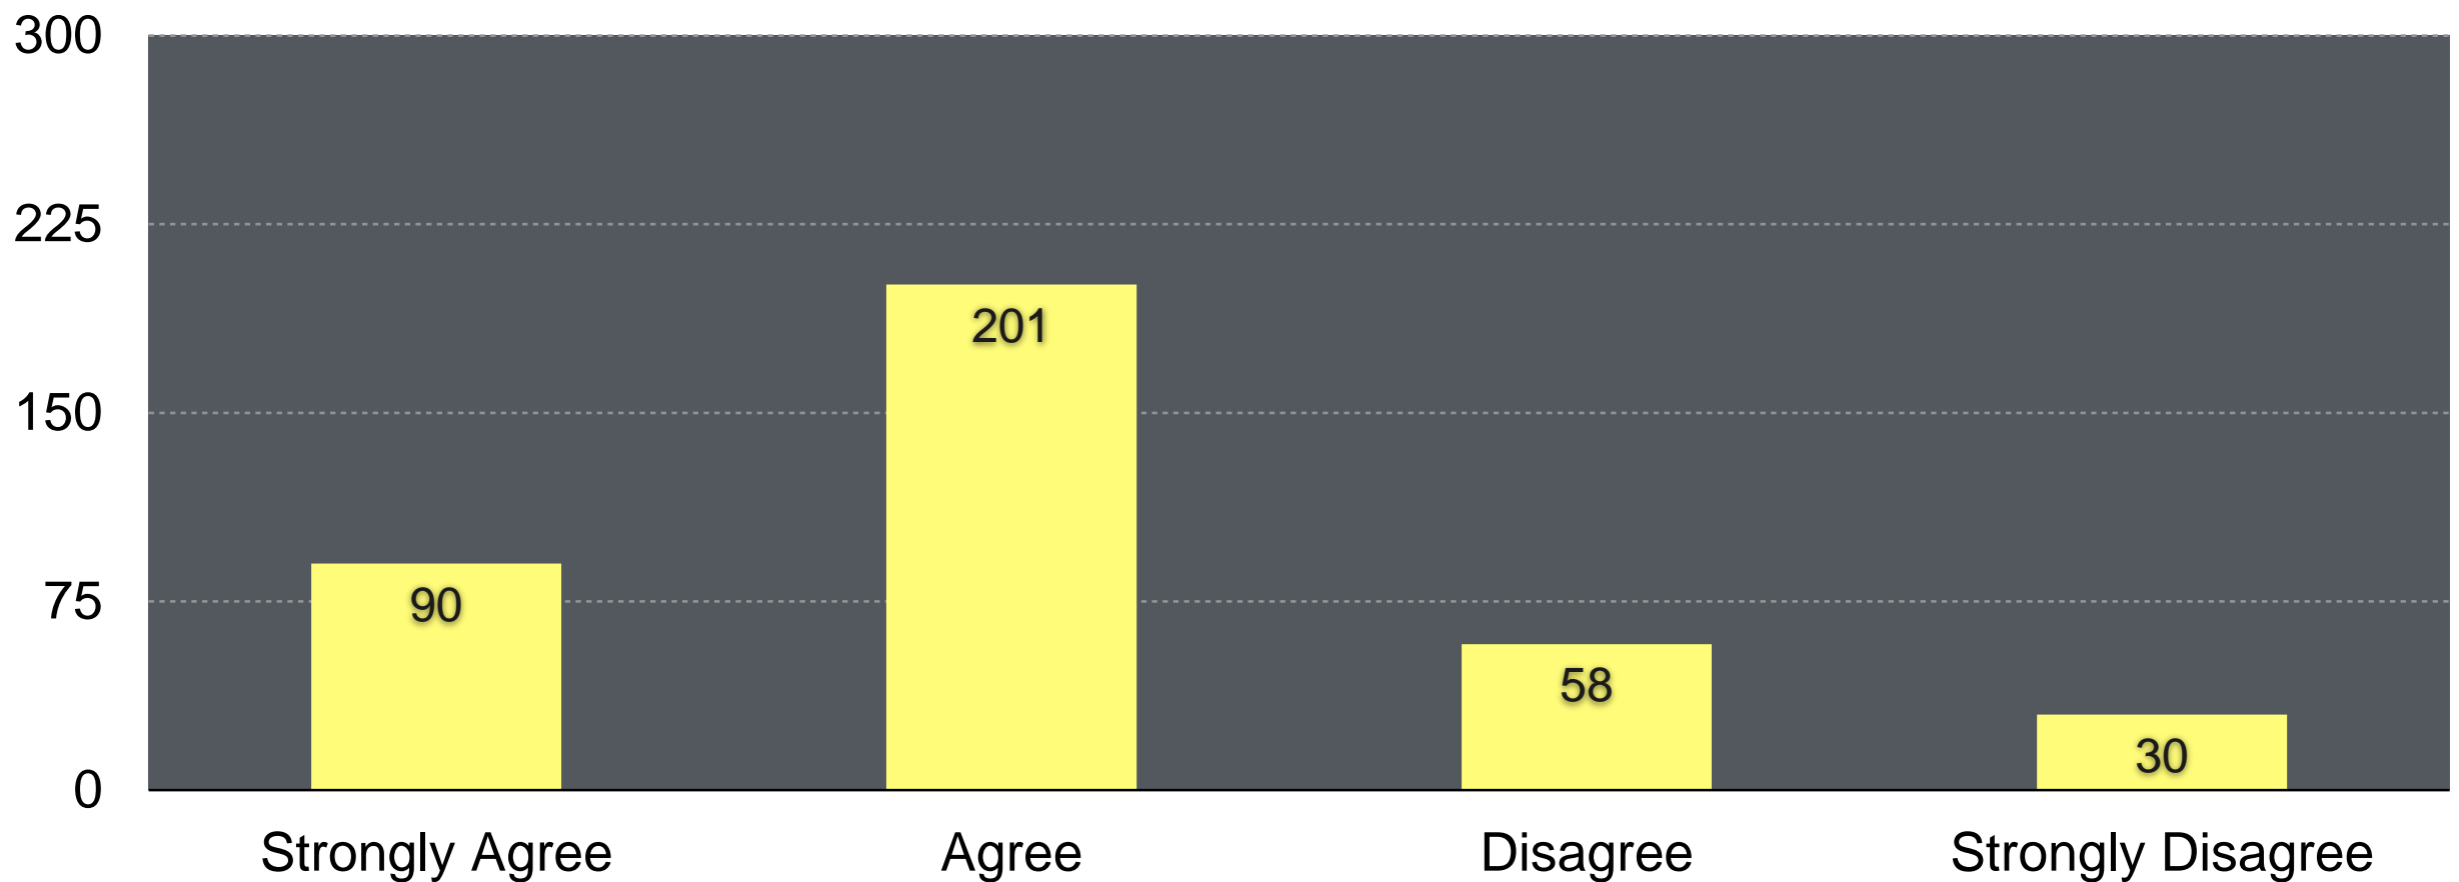

(as of 4/15/2016)

Seeking Class Member

Website Survey Non-Residential:

3) Increase the uptake of existing and new energy efficiency programs and funding opportunities by setting up outreach and education initiatives with "validators," e.g., contractors and trade associations that have trusted relationships with class members.

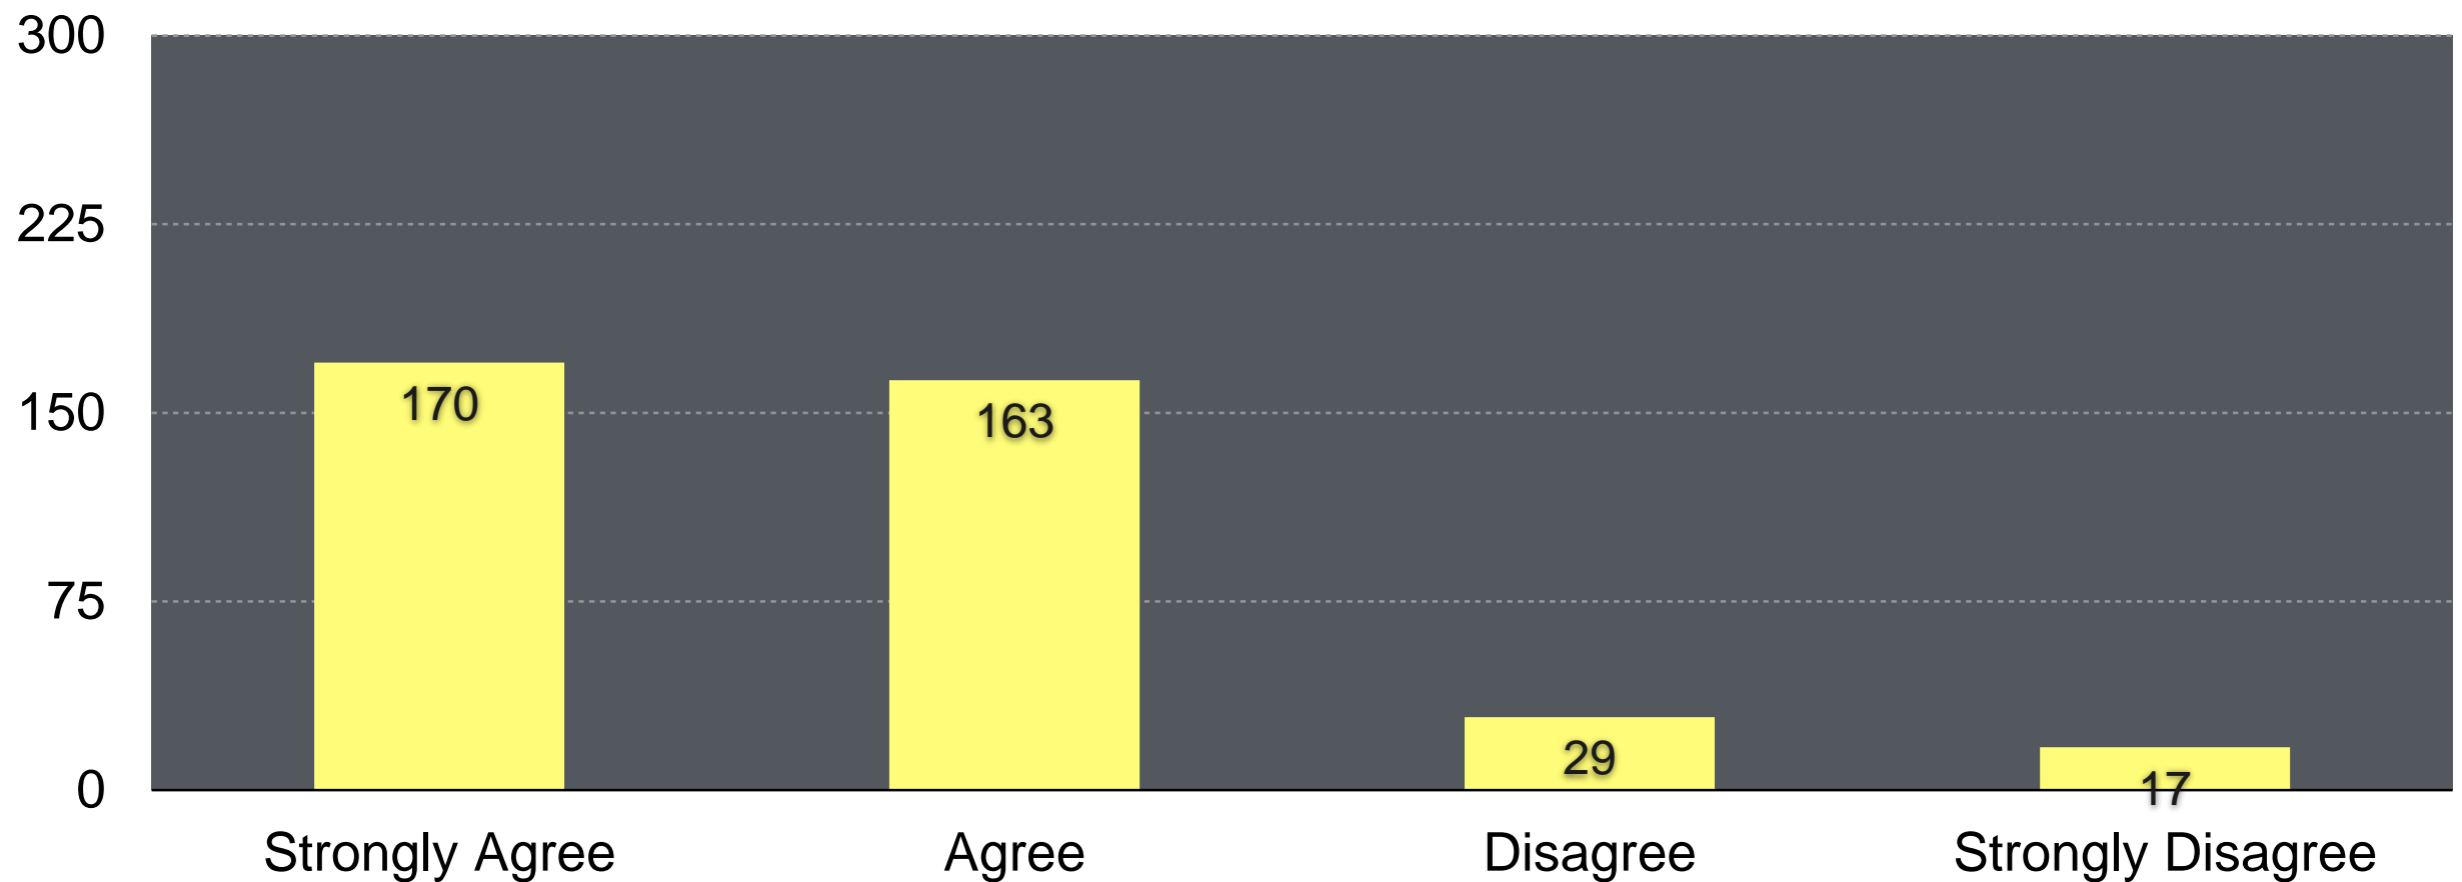

(as of 4/15/2016)

Seeking Class Member

Website Survey Non-Residential:

4) Offer incentives to small businesses and nonprofit organizations to upgrade equipment to higher energy efficiency standards.
